

SKY WORKER PTK-31

Yearly cost savings and increased productivity makes The Sky Worker the most sensible roofing crane.

UPFRONT SAVINGS: \$53,300 EVERY YEAR
Add first year write off and you have payback in 2 years

List of operational savings and increased productivity

1. Much lower insurance. (Listed as scheduled equipment) \$3,300 per year compared to \$3,300 per month for a boom truck. **That's \$36,300 every year.**
2. No large truck tires. \$600 each x 10= \$6,000 with 18 month life is **\$4,000 per year**
3. Big truck maintenance. **\$1,000 per year**
4. Major fuel cost reduction. Boom truck gets 5mpg @ 50 miles a day is 10 gal. x \$4 = \$40+ \$20 run time on job is \$60 per day x 5 is \$300 per week. Allowing 40 weeks working a year = **\$12,000 every year**
5. No CDL driver needed
6. Regular crew can operate
7. No damage to property (driveways, curbs or lawns)
8. Replaces man-lift with an articulating and self-leveling man-lift
9. Replaces tractor trailer to haul the man lift and the truck insurance
10. No travel restrictions like large trucks have
11. Much more accessible to residential work
12. Unlimited access to university work and historic jobs
13. Perfect for coastal or island jobs where there is a weight restriction
14. Faster set up
15. Self Drive, from remote control, drives anywhere around any job
16. Can be driven, used and stored inside buildings
17. More efficient because of the articulating boom and operation may be from the roof
18. Safer because of remote control
19. Built in, real-time load measurement means you can't overload the crane — job safety
20. Conveniently switch from crane to man-lift in minutes
21. No rent fees, no waiting on rental delivery
